FALL SURPLUS LIST
1906

Orente Sud e Plant Co.,
3222 E. St., San Diego, Cal.

The Connecticut Agricultural Experiment Station

Office of State Entomologist

New Haven, Conn.

CERTIFICATE OF INSPECTION

This is to Certify that the stock and premises of The Elm City Nursery Co., of New Haven, Conn., has been carefully examined in compliance with the provisions of Chapter 122 of the acts of the General Assembly, January Session of 1901, and that it is apparently free from dangerous injurious insects and diseases.

This certificate is invalid after October 1st, 1907.

W. E. BRITTON, State Entomologist.

THE NEW FERN-LEAVED STAGHORN SUMACH.

fern Leaf Sumach *Rhus Typhina* var. *laciniata*.

This remarkable variety of our native stag-horn sumach has the same rapid growth of the common form, producing the same showy cones of bright red fruit, but as the illustration will show the leaves are so beautifully formed that they rival the most delicate fern in their intricacy. This shrub will thrive on the poorest of soils with a surprising luxuriance. Every nurseryman can well afford to stock up with this desirable plant, as the park people and landscape men are getting to know its value.

See page 3 for plants.

See page 4 for cuttings.
